

HIGH PRODUCTION PILLOW TICK MACHINE

Two tubes of continuous over locked sewn material are fed into the machine side by side, length measures, cut and then transported at high speed into the sewing section where both ends are over locked. The material is then fed into the next cutting section and cut in half (giving 2 ticks per length of sewn materials with 3 sides sewn). The ticks are then stacked onto a conveyor with the open side's together.

Technical info:

Production: pillow ticks, also with blow hole, pillow cases, floor cloths and cleaning cloths

Max: 80x80 cm
Min: 40x40 cm
