

Cutting and sewing

KA162

This machine is used to pre-sew before feeding into the KA145 binding machine and also to make it easier to manually edge bind quilts and mattresses. For multi-needle quilted and filled material. The material is length measured and then cross sewn and cut off. On each side of the cut there will be a chain stitch seam. Should be positioned after a long side sewing KA1041.

TECHNICAL SPECIFICATION

Length x width	1.2m x 5m
Quilts per minute	up to 5
